## LOUNGER M

### QUICK AND EASY ASSEMBLY

The **LOUNGER M** can easily and be built by two people in 15 minutes without tools. The canopy is folded like a parasol and put under tension in one movement by the innovative tension mechanism. Then, the legs and stability cables can be mounted. If desired, a tripod support can be used to support the structure while installing the legs.

#### SPECIFICATIONS

MEASUREMENTS IN FEET

13.6' (L) x 13.6' (W) x 11.1' (H) / Entrance 7.97'

## OUR TENTS OFFER THE FOLLOWING BENEFITS

**QUICK AND EASY ASSEMBLY** Assembly in less than 90 minutes

**ENDLESS BRANDING POSSIBILITIES** Custom branding with graphics, logos and more

**ROBUST LIGHTWEIGHT ALUMINUM STRUCTURE** Made of strong light weight material

**TOP QUALITY FABRIC MATERIALS** Made of high quality fabrics

**OPEN STRUCTURE DESIGN** Wide open space inside with plenty of space for guests

**EXPANDABLE** Versatile and highly customizable to fit any need

**FOR FULL PRODUCT DESCRIPTIONS, DETAILS AND INFORMATION PLEASE VISIT OUR WEBSITE**

## LOUNGER L

### QUICK AND EASY ASSEMBLY

The **LOUNGER L** can easily and be built by two people in 15 minutes without tools. The canopy is folded like a parasol and put under tension in one movement by the innovative tension mechanism. Then, the legs and stability cables can be mounted. If desired, a tripod support can be used to support the structure while installing the legs.

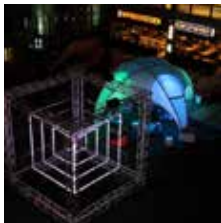

The **LOUNGER L** is a complete re-design of the compact marquee, available in two convenient sizes. Designed by an Aerospace Engineer in Holland and manufactured to arguably the most stringent standards in Germany, the **LOUNGER L** is 100% European and is not only designed to stand out, but also to last for many years. Using extruded 90mm aluminium tubing, galvanized steel and marine grade stainless steel tension cables, the Lounger structure is like no other.

#### SPECIFICATIONS

MEASUREMENTS IN FEET

17' (L) x 17' (W) x 11.8' (H) / Entrance 7.97'

## CROSSOVER M

### QUICK AND EASY ASSEMBLY

The **CROSSOVER M** can be easily assembled by two men within 45 minutes using a telescopic lift or crane. As the structure is built from the ground up in layers, the need to work at height is eliminated. Due to the limited size and weight of the components, no tools are required for its assembly and as they are very easy to handle, height and muscle strength is not necessary.

Assembling the structure without a lift or crane is possible and in many cases often faster, however it is not recommended because it can result in unfavourable forces being applied to the structure which may lead to damage.

The **CROSSOVER M** is a revolutionary design from top to bottom of the standard marquee. Designed by an Aeronautical Engineer in Holland and manufactured to arguably the most stringent standards in Germany, the Crossover is 100% European and is not only designed to stand out, but also to last for a very long time.

#### SPECIFICATIONS

MEASUREMENTS IN FEET

20.4' (L) x 20.4' (W) x 12.1' (H) / Entrance 7.09'

## CROSSOVER L

### QUICK AND EASY ASSEMBLY

The **CROSSOVER L** is a revolutionary design from top to bottom of the standard marquee. Designed by an Aeronautical Engineer in Holland and manufactured to arguably the most stringent standards in Germany, the **CROSSOVER L** is 100% European and is not only designed to stand out, but also to last for a very long time. Using extruded 90mm aluminium tubing, galvanized steel load bearing joints and marine grade stainless steel tension cables, the Crossover will undoubtedly get people talking.

#### SPECIFICATIONS

MEASUREMENTS IN FEET

20.4' (L) x 20.4' (W) x 12.1' (H) / Entrance 7.09'

## HEXADOME M

### QUICK AND EASY ASSEMBLY

The **HEXADOME M** is truly one of a kind. Its name is derived from its design. Unlike our other structures, the **HEXADOME M** has a six-sided hexagonal base and a beautifully domed top. It is big, bold and unforgiving with a grand ceiling height.

This huge structure is ideal on its own or you can have our Crossover M 6mt x 6mt structure attached to each of its sides to create a honeycomb effect of even larger spaces. Like the rest of our range, the Hexadome is a revolutionary design from top to bottom of the standard large marquee. Designed by an Aerospace Engineer in Holland and manufactured to arguably the most stringent standards in Germany, the Crossover is 100% European and is not only designed to stand out, but also to last for a very many years. Using extruded 90mm aluminium tubing, galvanized steel load bearing joints and marine grade stainless steel tension cables, the **HEXADOME M** simply blows people away with its style, quality and design.
